## **CLAIMS**

15

What is claimed is:

- 1. A light emitting diode package comprising:
- a ceramic cavity comprising a substrate for mounting a light emitting diode and substantially vertical sidewalls for minimizing light leakage; and a metallic coating on a portion of said ceramic substrate for reflecting light in a predetermined direction.
- The light emitting diode package of Claim 1 wherein said ceramic cavity is filled with an optically transparent material.
  - 3. The light emitting diode package of Claim 1 wherein said ceramic cavity is substantially white in color.
  - 4. The light emitting diode package of Claim 1 wherein said metallic coating comprises silver.
- 5. The light emitting diode package of Claim 1 wherein said metallic20 coating comprises gold.
  - 6. The light emitting diode package of Claim 1 wherein said metallic coating is formed by plating.

## 70030735-1

20

- 7. The light emitting diode package of Claim 1 wherein said ceramic cavity is formed to contain a plurality of light emitting diodes.
- 8. A method for manufacture of a light emitting diode package comprising: forming a ceramic cavity comprising a substrate for mounting a light emitting diode and substantially vertical sidewalls for reducing light leakage; coating a portion of said ceramic cavity with a light reflective material; positioning a light emitting diode on said substrate; and depositing an optically transparent material in said cavity to protect said light emitting diode.
  - 9. The method as described in Claim 8 wherein said ceramic cavity is substantially white in color.
- 15 10. The method as described in Claim 8 wherein said light reflective material comprises silver.
  - 11. The method as described in Claim 8 wherein said light reflective material comprises gold.
  - 12. The method as described in Claim 8 wherein said reflective coating is formed using plating.

10

20

- 13. The method as described in Claim 8 wherein said ceramic cavity is formed to mount a plurality of light emitting diodes.
- 14. A light source comprising:
- a ceramic cavity comprising a substrate for mounting a light emitting diode and sidewalls for reducing light leakage;

a metallic coating on a portion of said ceramic substrate for reflecting light in a predetermined direction;

a light emitting diode coupled to said substrate; and an optically transparent coating for protecting said light emitting diode.

- 15. The light source of Claim 14 wherein said ceramic cavity is substantially white in color.
- 15 16. The light source of Claim 14 wherein said metallic coating comprises silver.
  - 17. The light source of Claim 14 wherein said metallic coating comprises gold.

18. The light source of Claim 14 wherein said metallic coating is formed by plating.

## 70030735-1

19. The light source of Claim 14 further comprising a plurality of light emitting diodes coupled to said substrate.
